Petition to Commissioner of Patents
 Regarding Application # 10,083,771
 Title – Dynamic snag-resistant fishing weight
 Inventor - Huey Thomas Crochet
 Applicant - Huey Thomas Crochet
 Examiner - Kurt Rowen
 Art Unit - 3643

Sir, the applicant's application has gone abandoned on Aug. 08, 05.

A petition was filed, in a timely fashion by mail and fax, from Aug. 2 – Aug 8, 05, to Director Don Hajec of group 3600 with regard to an error on the part of the applicant's examiner.

The record shows clearly that said examiner has indeed made an error which inappropriately instigated said statutory abandonment.

After receiving no official response from the Director, directly addressing said petition, said applicant filed another petition to said Director on Aug. 26, 05.

As of this day, Sept 3, 05, the applicant has received no official response to said petitions. However, the Director has tacitly agreed with the applicant's petitions by forwarding the examiner's proposed claims to said applicant after receiving said petitions.

There have been five unofficial proposals of claims and two sets that were faxed on official PTO stationery making a total of seven.

Since the Director and the Examiner obviously do agree with the applicant, said applicant respectfully requests that he be allowed to write a new claim to save time, resources, and repeated proposals or, have the Director enact a withdrawal of abandonment to open the avenue for appeal by the applicant in view of the already reconsidered claims, 9-10.

Thank you.

Signed Huey Thomas Crochet

Money for this petition is already in the applicant's case file from a previous petition which was treated as a petition to the director and therefore no fee was required.

Date Sept 3, 05
